

# CAT SERIES

# **It is not just about building and designing boats, it is what we love to do**

Our passion for detail and sophisticated Italian design has been our secret since the 1960s.

To meet the needs of our clients, in the 1990s our inhouse production was moved from Italy to Florida, one of the most developed marine areas in the world.

Today, Novurania continues to lead the market. Our heritage and innovation guarantees the production of exceptionally beautiful as well as high-quality boats and luxury yacht tenders.

## **A know-how passed on for more than half a century**

Since the beginning, we controlled the main phases of the value chain to guarantee excellence and high quality.

We manufacture our own inflatable tube fabric, coated with neoprene CR on the inside and with Hypalon CSM on the outside, delivering exceptional durability and strength.

We are revolutionizing the industry by producing the highest performance line of inflatable boats. Our craftsmanship balances elegant exterior design with meticulous technical mastery beneath the surface.

## **Vertically integrated value chain**

From mold to finished product: every step is crafted in-house, allowing complete control and the ability to adapt to every need.

## **In-house engineering & design**

Close collaboration with every client, delivering custom lifting points, garage fittings, and tailored solutions.

## **Customization**

Designed around you: every layout, finish, color, accessory tailored to reflect your personal style and vision.
